South Carolina Short Term Projections 2022-2024

Ashlyn Chastain, Workforce Insights Analyst, Labor Market Information

March 29, 2023

# Introduction

Ashlyn Chastain - achastain@dew.sc.gov

## Academic Background:

University of South Carolina – BA in Experimental Psychology

Clemson University – Masters in Public Administration (MPA)

## Professional Title:

Workforce Insights Analyst

- Pee-Dee WIOA region consisting of 13 counties in the Waccamaw, Santee-Lynches, and Pee Dee areas

Projections analyst

- Short Term (2022-2024)
- Long Term (2022-2032)

# Short Term Projections 2022-2024

## Overview:

- Short term projections are produced and published annually for a 2-year projection period
- Projections provide us with estimated forecast data regarding the rate at which occupations and industries are growing, as well as the number of jobs present at that time.

## Types of Changes:

- **Numeric:** the numerical change will provide us insight into the overall increase in job availability associated with these industries and occupations over the 2-year projected period.
- **Percent:** the percentage change will allow us to see at what rate these industries and occupations are estimated to grow over the 2-year projected period.

# Components for Projected Annual Openings for Occupations

LMI projected annual openings by occupation can be broken into three individual parts:

1. Openings due to growth within industries where occupations are concentrated
2. Openings due to transfers between occupations, as workers continue to explore different career choices
3. Openings due to exits out of the labor force, which are mainly due to retirements

Transfers and exits can be combined to represent openings due to replacement needs

South Carolina – Total # of Openings (2022-2024)	Openings Due to Growth	Openings Due to Transfers	Openings Due to Exits
596,174	48,173	317,807	230,194
Share of Total Projected Openings →	8%	53%	39%

# Short Term Projection Dashboards

LMI has produced dashboards so that individuals can have South Carolina's projection data at their fingertips.

For Short Term Projections there are three associated dashboards:

- Short Term Projections by Occupation (2022-2024)
- Short Term Projections by Industry (2022-2024)
- Short Term Projections (2022-2024)

Each of these dashboards can be accessed through our website under *Employment Projections*. From here you will select *Dashboard*, under *Short-Term Occupational or Industry*, and you will be redirected to Tableau Public.

# Conclusion

South Carolina's Short Term projection data is indicative of an increase in customer service and retail-trade occupations, as well as an increase in jobs within the Health Care and Social Assistance industry.

The Information industry is the projected number one fastest growing industry for 2022-2024.

Short term projections can be accessed via Tableau Public and filtered depending on specific needs. These projections can be filtered by SOC level and industry type.
